CONFIDENTIAL INVESTMENT BRIEF | MARCH 2026

Trinity Air Link Transportation System

America's First Integrated eVTOL & Autonomous Vehicle Transportation Hub
Fort Worth, Texas

A compelling investment opportunity at the intersection of advanced air mobility, autonomous vehicles, and transit-oriented real estate in one of America's fastest-growing metro regions.

$129M	22.3%	5x	2030
TOTAL CAPITAL	PROJECTED IRR	TARGET MULTIPLE	BREAKEVEN YEAR

Investment Opportunity

$129M TOTAL INVESTMENT (4 PHASES)	**22.3%** PROJECTED IRR (MODERATE)	**$133M** YEAR 5 REVENUE (MODERATE)
8.7M DFW METRO POPULATION	**$710B+** DFW REGIONAL GDP	**First-Mover** NO COMPARABLE HUB IN TX

INVESTMENT THESIS

- **Infrastructure play, not a tech bet.** The Trinity Air Link is a physical transportation terminal — a vertiport and AV hub — not an aircraft manufacturer. We capture value at the infrastructure layer regardless of which eVTOL or AV operator wins.
- **Federal regulatory tailwind.** The FAA's eVTOL Integration Pilot Program (eIPP), announced March 9, 2026, selects Texas DOT + Archer Aviation as a national site — creating immediate commercial revenue opportunity before full FAA type certification.
- **Historic asset with tax advantages.** The T&P Warehouse qualifies for 20% Federal Historic Tax Credits, reducing effective renovation cost by $3–4M.
- **Multiple revenue streams.** Fees from eVTOL operations + AV fleet + 120,000 SF Innovation Center real estate + technology licensing + ancillary retail/cargo — providing downside protection if any single stream underperforms.
- **Zero municipal capital required.** City provides regulatory facilitation and potential bond support; private capital deploys into a commercially structured entity.

The Market Inflection

DFW Transportation Crisis

- 69 hours lost per DFW commuter annually (TX A&M, 2024)
- $1,618 annual cost per commuter — fuel + productivity
- 44 of Texas' 100 most congested roads are in DFW
- 10th worst commute in the U.S. — Fort Worth (Forbes, 2025)
- <1% of workers use public transit
- Congestion cost projected to reach $36.4B/year by 2050

eVTOL & AV Readiness

- Archer Aviation: Part 135/145 certified; commercial revenue Q1 2026; Texas eIPP selected
- Joby Aviation: FAA Stage 4 of 5 certification; Toyota-backed $1B+; commercial 2026
- Waymo Level 4: Austin, TX commercial ops March 2025; 450K+ rides/week
- UAM market: $4.6B (2024) → $29.2B (2030); 31–34% CAGR
- FAA eIPP enables pre-certification revenue passenger ops — H2 2026

The Timing: The window to establish the Fort Worth vertiport anchor for the Texas eIPP network is *now*. Dallas is named in the initial Texas eIPP route set; Fort Worth is the adjacent market requiring an infrastructure node. First-mover capture of this position determines long-term competitive position.

The Asset

T&P Warehouse

Texas & Pacific Warehouse
221 W. Lancaster Avenue, Fort Worth, TX

- 8-story historic warehouse: 600 ft × 100 ft = 480,000 gross SF
- 120,000 SF leasable Innovation Center (floors 2–7)
- Rooftop: eVTOL landing pads + charging infrastructure
- Ground level: AV terminal, passenger processing, retail
- Adjacent to Amtrak station, TEXRail, Trinity Metro bus hub
- Structural repair: $2.15M (already assessed)
- Federal Historic Tax Credit eligible: 20% of qualified expenses
- Class A downtown FW office rent: $30.68/SF (CommercialCafe, 2025)

Financial Projections

Capital Deployment by Phase

Phase 1	Phase 2	Phase 3	Phase 4
Planning & Prep	Infrastructure	Technology	Operations
2026	2027	2028	2029
$20M	$50M	$32M	$27M
Regulatory, design, team, eVTOL/AV MOUs	T&P renovation, rooftop eVTOL facilities, AV terminal	Fleet acquisition 10–15 eVTOL + AV fleet + AI systems	Working capital, fleet expansion, marketing launch

Year 5 Revenue by Stream (Moderate Scenario)

Revenue Stream	Conservative	Moderate	Optimistic	Assumptions (Moderate)
eVTOL Operations	$21.9M	$54.8M	$131.4M	30 aircraft × 10 flights × 5 pax × $100/trip × 365d
AV Fleet Services	$16.4M	$54.8M	$137.3M	75 vehicles × 20 trips × 5 pax × $20/trip × 365d
Innovation Center (Real Estate)	$2.4M	$3.8M	$5.1M	120K SF × 90% occupancy × $35/SF/yr
Technology Licensing / IP	$4.0M	$10.0M	$16.0M	Partner licensing + consulting
Ancillary (Retail, Cargo, Parking)	$6.0M	$10.0M	$16.0M	Retail/dining + cargo operations
TOTAL REVENUE	**$50.7M**	**$133.4M**	**$305.8M**	
Total OpEx	**($73.5M)**	**($88.5M)**	**($103.5M)**	**Personnel, tech, facilities, debt service**
EBITDA	**($22.8M)**	**$44.9M (34%)**	**$202.3M (66%)**	

5-Year Cash Flow (Moderate Scenario)

Year	Phase	Capital Deployed	Revenue	Operating CF	Cumulative CF
2026	Phase 1	($20M)	$0	($5M)	($25M)
2027	Phase 2	($50M)	$5M	($10M)	($80M)
2028	Phase 3	($32M)	$25M	($5M)	($92M)
2029	Phase 4	($22M)	$65M	$20M	($29M)
2030	**Phase 5**	**($5M)**	**$133M**	**$45M**	**+$44M**

22.3%

Projected IRR

Investment schedule: ($20M) / ($50M) / ($32M) / ($22M)
Return schedule: $0 / $5M / $25M / $65M / $133M+
Break-even: Year 5 (2030) — positive cumulative cash flow
Sensitivity: 17.8% IRR at 75% revenue assumption; 26.1% IRR at 125% scenario

Capital Structure

Equity — 45% ($58M)

Founder/management: $5M · Angels: $8M · VC (mobility focus): $15M · PE infrastructure: $25M · Strategic investors: $5M

Grants — 15% ($20M)

Federal (USDOT ATTAIN, FAA UAM): $8M · State of Texas (TEF, TxDOT Innovation): $6M · Local FW incentives: $4M · Foundation grants: $2M

Debt — 35% ($45M)

Commercial bank loans: $20M (7–10%) · Equipment financing: $15M (5–8%) · Municipal bonds: $10M (4–6%, 15–20yr)

Revenue-based — 5% ($6M)

Phase 4 revenue-based financing (12–18% IRR equiv.) once operations proven; no dilution

Competitive Moat

Physical Infrastructure Scarcity

The T&P Warehouse is the only building in downtown Fort Worth with the footprint, structural capacity, and multimodal adjacency (Amtrak, TEXRail, bus) to serve as a true intermodal hub. Competitors cannot replicate the location.

Regulatory First-Mover

FAA eIPP participation + established relationships with TxDOT Aviation, Fort Worth municipal partners, and FAA regional office create a regulatory moat that delays any competitor by 18–36 months.

Operator-Agnostic Platform

The Link charges landing/docking/terminal fees like an airport or port, not a single-operator service. Joby, Archer, Waymo, and others all pay to access the infrastructure — diversifying away from any one technology provider.

Multi-Revenue Lock-in

Innovation Center tenants on multi-year leases + eVTOL operator MOUs + AV fleet contracts create a layered revenue stack where no single stream dominates. Each layer protects the others.

Historic Tax Credit Arbitrage

Federal 20% Historic Tax Credits on qualified renovation expenses reduce effective cost by $3–4M and create a preferential capital structure unavailable to new-build competitors.

Network Effect Potential

Each eVTOL route added increases value of all existing routes (more O&D pairs). Each AV vehicle added reduces per-ride unit cost. The hub model compounds in value as scale increases — a classic network effect.

Key Risks & Mitigations

FAA Approval Delays — eVTOL certification slower than projected	MEDIUM	Mitigation: AV operations launch first; eIPP enables pre-cert revenue
Construction Cost Overruns — Historic renovation complexity	MEDIUM	Mitigation: 15–20% contingency reserve; fixed-price contracts; structural pre-assessed
Market Adoption Pace — Consumer uptake of eVTOL slower than modeled	MEDIUM	Mitigation: Conservative model uses 8 flights/aircraft/day; real estate income provides floor
Interest Rate Risk — Capital market changes affecting debt cost	MEDIUM	Mitigation: Fixed-rate debt preference; diverse funding sources; grant component lowers leverage need
Competitor Entry — Large tech players entering DFW market	LOW	Mitigation: Physical infrastructure moat; exclusive location; regulatory relationships
Safety Incident — eVTOL or AV accident	LOW (<5%)	Mitigation: $100M+ aviation liability; partner with Stage 4+ FAA certified operators only

Exit Pathways

STRATEGIC ACQUISITION	INFRASTRUCTURE REIT / FUND	IPO / SPAC
4–7×	**12–18×**	**10–20×**
Revenue multiple · eVTOL manufacturer or mobility platform acquires infrastructure layer (Joby, Waymo, Archer)	EBITDA multiple · Brookfield, Macquarie, or Blackstone rolls up as transportation infrastructure asset	Revenue multiple · Public market listing as the first pure-play multi-modal AAM infrastructure company

Technology Partner Ecosystem

Operator-agnostic infrastructure enables partnerships with leading certified or near-certified operators:

- **Archer Aviation (Part 135 cert; Texas eIPP selected)**
- **Joby Aviation (FAA Stage 4; Toyota $1B+)**
- **Waymo (Level 4; Austin TX commercial ops)**
- **Beta Technologies (CX300 certified)**
- **Wisk Aero (Boeing-backed; autonomous)**
- **REEF Technology (vertiport operations)**

Phase 1 Capital Raise — $20M Target (Q1–Q3 2026)
Current raise: Founder commitment + angel round ($13M) + federal/state grant applications ($7M). Seeking lead investor for Series A structured as infrastructure equity with 1× non-participating liquidation preference, weighted-average anti-dilution. Pre-money valuation: $40M. Board seat available for $5M+ commitment.
