

EXECUTIVE SUMMARY | MARCH 2026

Trinity Air Link Transportation System

America's First Integrated eVTOL–Autonomous Vehicle Mobility Hub

A comprehensive analysis of the market opportunity, technical architecture, financial projections, regulatory pathway, and investment case for transforming the historic Texas & Pacific Warehouse in downtown Fort Worth, Texas into the nation's first multi-modal eVTOL and autonomous vehicle transportation hub.

The Vision: Fort Worth's Transportation Future Starts Here

The Trinity Air Link is a proposed public-private transformation of the historic Texas & Pacific Warehouse in downtown Fort Worth into America's first fully integrated multi-modal transportation hub — combining commercial eVTOL (electric vertical take-off and landing) aircraft, Level 4 autonomous vehicles, a 120,000 SF innovation center, and a restored historic landmark into a single, seamlessly connected facility.

Fort Worth is the 12th largest city in the United States, the fastest-growing large city in Texas, and faces a transportation crisis of national significance. The Link addresses that crisis with proven technology, a phased capital plan, and a model replicable across every major U.S. metro.

69 hrs LOST PER COMMUTER/YR (TX A&M)	\$1,618 ANNUAL CONGESTION COST/DRIVER	<1% WORKERS USING TRANSIT	\$36.4B CONGESTION COST BY 2050	10th WORST COMMUTE IN U.S. (FORBES)
---	--	---	--	--

Air Mobility Platform (Rooftop)

Landing pads + charging infrastructure for commercial eVTOL aircraft. Partners include Archer Aviation (Texas eIPP-selected, Part 135 certified, commercial 2026) and Joby Aviation (FAA Stage 4, Toyota-backed \$1B+). Point-to-point fares: \$75–\$150/trip at 150–200 mph.

Autonomous Vehicle Hub (Ground)

Level 4 AV terminal for first/last mile connectivity across DFW. Waymo operates commercially in Austin TX (March 2025) with 450K+ rides/week. AV platform brings 88% fewer property damage claims, 92% fewer injury claims vs. human drivers (Swiss Re, 25.3M miles).

Innovation Center (Floors 2–7)

120,000 SF of Class A technology workspace in a nationally recognized historic building. Fort Worth Class A rents: \$30.68/SF (CommercialCafe, 2025). Tenants: transportation tech, aerospace, AI, and logistics companies requiring proximity to operating eVTOL/AV infrastructure.

The Asset: T&P Warehouse

The 8-story Texas & Pacific Warehouse is an architecturally significant historic property adjacent to Fort Worth's Amtrak station, TEXRail terminus, and Trinity Metro bus hub — one of the only sites in the region with the scale and intermodal connectivity required for a true transportation hub. Federal Historic Tax Credits reduce effective renovation cost.

The Regulatory Moment

The FAA eVTOL Integration Pilot Program selected Texas DOT + Archer Aviation as a national site. The program creates a formal pathway for operational integration planning and regulator coordination while FAA certification and safety requirements remain fully in force. Fort Worth can position as the western DFW vertiport anchor.

Investment & Financial Snapshot

2026 · PHASE 1

\$20M

Planning, regulatory, team,
partner MOUs

2027 · PHASE 2

\$50M

T&P renovation, rooftop eVTOL,
AV terminal

2028 · PHASE 3

\$10M–\$32M

Operator access infrastructure,
AI systems, dispatch, charging,
and optional seed fleet

2029–30 · PHASE 4–5

\$22M

Operations launch; breakeven
Year 5

REVENUE STREAM (YEAR 5)

	CONSERVATIVE	MODERATE	OPTIMISTIC
Air Mobility Platform Revenue	\$21.9M	\$54.8M	\$131.4M
Ground Mobility Platform Revenue	\$16.4M	\$54.8M	\$137.3M
Innovation Center (Real Estate)	\$2.4M	\$3.8M	\$5.1M
Technology Licensing + Ancillary	\$10.0M	\$20.0M	\$32.0M
TOTAL	\$50.7M	\$133.4M	\$305.8M

Calculated project IRR: 24.8% before terminal value · 36.8% IRR with \$480M moderate terminal value · NPV @ 10%: \$89.7M before terminal / \$293.2M with terminal · Breakeven target: Year 5 (2030) · Funding mix: 45% equity / 35% debt / 15% grants / 5% revenue-based

The preferred deployment model is operator-neutral and capital-light, allowing third-party vehicle operators to carry fleet capex while Trinity Air Link monetizes infrastructure access, charging, dispatch, passenger processing, and data services.

Partnership & Stakeholder Asks

CITY OF FORT WORTH / TARRANT COUNTY

- Execute MOU to designate T&P Warehouse as Fort Worth's official eVTOL/AV hub
- Provide letter of support for FAA eIPP enrollment and TxDOT coordination
- Explore expedited historic preservation and permitting pathway
- Connect TAL team with Fort Worth EDC and economic incentive programs

PRIVATE INVESTORS

- Lead or join Phase 1 equity raise (\$20M)
- Support federal/state grant applications alongside equity close
- Execute strategic/operator MOUs where relevant
- Board and advisory participation available for anchor investors

TXDOT / FAA eIPP TEAM

- Include Fort Worth Trinity Air Link in Texas eIPP network as Fort Worth vertiport node
- Coordinate airspace integration planning with FAA Southwest Region
- Technical assistance through TxDOT Emerging Aviation Technology Section

EVTOL / AV TECHNOLOGY PARTNERS

- Execute vertiport capacity MOU for Texas eIPP operations
- Co-develop ground operations standards with Hub team
- Preferred operator agreements and Innovation Center anchor tenancy
