The Business Case for Trinity Air Link

Trinity Air Link Transportation System | America's First Integrated eVTOL–AV Transportation Hub

A comprehensive business case demonstrating the commercial viability, strategic rationale, stakeholder value, and implementation pathway for transforming Fort Worth's T&P Warehouse into a groundbreaking multi-modal transportation hub.

SECTION 01 · EXECUTIVE CASE

The Business Opportunity in One Page

The Problem

- 8.5M DFW residents losing 174M hrs/year to congestion
- Fort Worth: 10th worst commute in America (Forbes 2025)
- \$1,618 wasted per driver per year in fuel & lost productivity
- \$36.4B projected annual congestion cost by 2050 if unchanged
- Highway expansion fails: induces demand within 5–7 years
- T&P Warehouse — 100-year-old landmark — deteriorating vacant
- No eVTOL ground infrastructure exists in DFW for aircraft arriving 2026

The Link Solution

- Repurpose T&P Warehouse as America's first integrated eVTOL-AV hub
- Rooftop eVTOL operations: 60–90 min trip → 10–20 min flight
- Level 4 AV ground fleet: proven technology (Waymo 450K rides/week)
- 120,000 sq ft Innovation Center for technology R&D (floors 2–7)
- AI-powered multi-modal traffic management system
- Historic preservation: \$2.15M structural rehabilitation
- Ground infrastructure for Archer/Joby eIPP aircraft arriving H2 2026

First Mover

No integrated eVTOL-AV hub in any major U.S. metro — first to market captures dominant position

Proven Returns

22.3% IRR (moderate); \$89M NPV; 4.2-year payback; \$133M Year-5 revenue (base case)

Iconic Asset

T&P Warehouse: historic landmark creates irreplaceable brand identity and location lock-in

Scalable Model

Proven concept replicable in 50+ U.S. metros — the franchise layer of a \$41B+ market

SECTION 02 · STRATEGIC RATIONALE

Why This. Why Fort Worth. Why Now.

THE CONVERGENCE MOMENT — MARCH 2026

- **Federal eIPP live today:** Texas DOT + Archer Aviation selected (March 9, 2026) — one of only 8 U.S. sites. Archer Midnight Texas air taxi operations begin H2 2026.
- **eVTOL certifications arriving:** Joby Aviation at FAA Stage 4/5 (November 2025), targeting 2026 commercial launch. Archer holds Part 135 Air Carrier certificate.
- **AV commercially proven:** Waymo delivering 450,000+ paid rides/week in 5 cities including Austin TX. Valued at \$126B.
- **Infrastructure gap:** Aircraft are coming to DFW — no vertiport exists in Fort Worth. The Link fills this gap as the natural anchor for the city's eIPP participation.
- **Window closing:** Each month of delay is a month of first-mover advantage lost to potential competitors.

Why Fort Worth Specifically

- Only U.S. metro with two cities over 1 million people
- Fort Worth (1M+) is the fastest-growing DFW city yet has no planned eIPP vertiport
- \$710B regional economy needs transportation at scale
- T&P Warehouse: central location, iconic brand, structural opportunity
- Receptive government — city council prioritizes economic development
- Texas Enterprise Zone and historic tax credit incentive environment

Competitive Moat

- Historic landmark — not replicable (location and asset are unique)
- Regulatory relationships established early create barrier to entry
- Technology partnership exclusivity agreements where possible
- First-mover brand recognition with customers and partners
- Network effects: each additional route increases hub value for all users
- 120,000 sq ft innovation center creates anchor tenant ecosystem

SECTION 03 · STAKEHOLDER VALUE

Value Created for Every Stakeholder

Government & Public Sector • \$500M+ economic multiplier effect from hub development • \$25M+ annual tax revenue (property, sales, income) • 2,500+ construction + 800+ permanent high-quality jobs • Historic preservation of iconic T&P Warehouse • Fort Worth named alongside Dallas as eIPP hub city — national recognition • Transportation innovation leadership positioning globally • 15–25% traffic reduction potential in downtown corridor • \$431.5B infrastructure need met via private capital, not public debt	Investors & Financial Partners • 22.3% projected IRR (moderate scenario) over 10 years • \$89M NPV at 10% discount rate • 4.2-year payback period • First-mover positioning in \$23–41B+ UAM market • 5 diversified revenue streams reduce single-point risk • Multiple exit strategies: IPO, M&A, REIT, franchise • Government incentives: Historic Tax Credit, TIGER, TEF • Scalable model replicable in 50+ U.S. metropolitan markets
Technology Partners • Real-world metropolitan-scale deployment platform • Reference customer status for global sales • Cross-platform data sharing and AI optimization • Joint IP development opportunities • Standards leadership — influence industry protocols • Innovation center anchor tenancy at preferred rates • Access to 8.5M DFW customer market from day one • Expansion pipeline: 50+ replication markets	Fort Worth Community • 40–60% commute time reduction on key corridors • Affordable alternatives: \$15–25 AV trips, competitive air fares • Historic T&P Warehouse saved and activated for public use • 800+ permanent jobs, prioritized local hiring • Environmental improvements: electric fleet, less road congestion • Accessible transportation for seniors and those with disabilities • Community spaces, retail, dining within the hub • Downtown revitalization connecting to Texas A&M corridor

SECTION 04 · IMPLEMENTATION PATHWAY

Four Phases to Full Operations (2026–2030)

PHASE 1 · 2026 Foundation · \$20M FAA eIPP enrollment, T&P lease execution, architectural design, regulatory permits, team building, technology partner MOUs (Joby, Archer, Waymo)	PHASE 2 · 2027 Infrastructure · \$50M Historic building restoration, rooftop eVTOL facilities, AV terminals, charging infrastructure, computing systems, innovation center build-out	PHASE 3 · 2028 Technology · \$32M eVTOL fleet deployment (10–15 aircraft), AV fleet launch (50 vehicles), AI traffic management activation, innovation center opens	PHASE 4 · 2029 Operations · \$22M Full commercial launch, fleet expansion (25–40 aircraft, 50–100 AV), marketing, customer acquisition, expansion planning to secondary markets
---	---	--	--

Key Success Factors

- ✓ Phase 1 funding secured (\$20M) by Q4 2026
- ✓ FAA eIPP enrollment and participation confirmed
- ✓ T&P Warehouse lease or purchase agreement executed
- ✓ Archer and/or Joby MOU for aircraft supply signed
- ✓ Fort Worth City Council partnership resolution passed
- ✓ Historic Tax Credit certification application filed
- ✓ TxDOT integration agreement established
- ✓ Level 4 AV partner (Waymo/May Mobility) engaged
- ✓ Innovation center anchor tenant LOI executed
- ✓ Community engagement plan launched with public meetings

The Ask: We are seeking \$20M in Phase 1 funding by Q4 2026 to complete regulatory approvals, execute the T&P Warehouse lease, finalize architectural design, assemble the leadership team, and sign technology partner MOUs. This phase validates the opportunity before the \$50M Phase 2 infrastructure commitment. The eIPP announcement makes 2026 the critical activation window.

Next Steps

Trinity Air Link Transportation System · Fort Worth, Texas

Investors: Request the detailed financial model, data room access, and management team meeting.

Government partners: Schedule a partnership discussion with the City of Fort Worth team.

Technology partners: Begin the technology assessment and integration planning process.
