

COMMUNITY BRIEF · MARCH 2026

Your Link. Your Future.

Trinity Air Link — What It Means for Fort Worth Residents

Transforming the historic Texas & Pacific Warehouse into a world-class transportation hub that creates jobs, preserves our heritage, reduces traffic, and positions Fort Worth as a global leader in mobility innovation.

800+

PERMANENT JOBS

2,500+

SECTION 01 · WHAT IS THE LINK?

Transforming Fort Worth's Most Iconic Building

The Trinity Air Link Transportation System is a proposal to transform the historic **Texas & Pacific Warehouse** in downtown Fort Worth — the landmark 8-story, 600-foot-long 1920s railroad building — into the nation's first integrated transportation hub.

The Link will combine **electric air taxis (eVTOL)**, **autonomous electric vehicles**, and a **120,000 sq ft innovation center** into a single, seamlessly connected facility that preserves Fort Worth's railroad heritage while pioneering its transportation future.

This is not science fiction. On March 9, 2026, the White House announced that **Texas DOT and Archer Aviation** were selected as one of only 8 national sites for the federal eVTOL Integration Pilot Program. Air taxi operations begin in Texas this summer. **The Link is the infrastructure that puts Fort Worth on that map.**

1M+ FORT WORTH RESIDENTS	69 hrs LOST PER COMMUTER/YEAR	10th WORST COMMUTE CITY, US	\$1,618 COST OF CONGESTION/DRIVER/YR
-----------------------------------	-------------------------------------	--------------------------------------	--

Fort Worth's challenge: Growing faster than any city in DFW — but ranked 10th worst commute city in America. The Link addresses that directly.

SECTION 02 · COMMUNITY BENEFITS

What the Link Delivers for Fort Worth

Jobs & Economic Growth	
DURING CONSTRUCTION 2,500+ construction jobs over 24 months	PERMANENT OPERATIONS 800+ permanent positions at the hub

- Local hiring preferences built into contracts
- Partnerships with Fort Worth trade schools
- Estimated \$150M+ in local economic activity

- Technology, transportation, operations, hospitality
- Training programs for local residents
- \$500M+ regional economic multiplier effect

Better Transportation for Everyone

AIR TAXI SERVICE

- 60-90 minute DFW car trips reduced to 10–20 min flights
- Point-to-point service across the metroplex
- Fares competitive with premium ride-share (\$75–150/trip)
- 100x quieter than traditional helicopters

AUTONOMOUS VEHICLES

- Level 4 self-driving vehicles for first/last-mile connectivity
- \$15–25 fares comparable to current Uber/Lyft pricing
- Accessible options for seniors and those with disabilities
- Connects to Trinity Railway Express and existing transit

Historic Preservation & Community Pride

SAVING THE T&P WAREHOUSE

- Rescuing a Fort Worth landmark from deterioration
- \$2.15M in immediate structural rehabilitation
- Historic character preserved and celebrated
- Building brought back to life after decades vacant

COMMUNITY SPACES

- Public areas within the hub for events and community use
- Transportation history exhibits honoring Fort Worth's past
- Restaurants, retail, and gathering spaces
- Gateway to the \$500M Texas A&M / Omni development district

SECTION 03 · ANSWERING YOUR QUESTIONS

Community Q&A

Q: Are air taxis safe? Will this put aircraft over our neighborhoods?

Modern electric air taxis have extensive redundant safety systems certified by the FAA. They are 100x quieter than traditional helicopters. Flight paths are designed to minimize noise over residential areas. The technology being used — Archer Midnight and Joby S4 — has undergone years of FAA certification testing. Waymo's autonomous vehicles have 88% fewer injury claims than human drivers. Safety is the first priority, not an afterthought.

Q: Will this increase traffic and congestion around the T&P area?

The hub is specifically designed to *reduce* local traffic by providing alternatives to driving. Most passengers will arrive via existing rail, bus, or autonomous vehicles. Smart traffic management systems actively reduce congestion around the facility. The goal is to take cars off the road, not add them.

Q: Is this affordable for regular Fort Worth residents?

Autonomous vehicle fares (\$15–25/trip) are priced comparably to current Uber/Lyft. Air taxi fares will be premium initially (\$75–150/trip) but will decline as fleet scales — similar to how Uber/Lyft prices dropped after launch. Subscription programs and community discounts are planned. All Fort Worth residents benefit from reduced traffic congestion on roads.

Q: How will construction affect daily life near downtown?

Construction is phased to minimize community disruption. Local traffic management plans will be implemented. Regular updates will be provided on progress. Local hiring is prioritized for construction jobs. Construction will be coordinated around major community events in the downtown area.

Q: What tax dollars are being spent on this project?

The Link is primarily a private investment project (\$129M total). Government incentives include standard federal programs (Historic Tax Credits, transportation grants) that are available to any qualifying project. The project will *generate* an estimated \$25M+ annually in new tax revenue for the City of Fort Worth by Year 5 — a net positive for public finances.

SECTION 04 · TIMELINE

Project Development Schedule

PHASE 1 2026 Planning	PHASE 2 2027 Construction	PHASE 3 2028 Technology	PHASE 4 2029+ Operations
- Community meetings begin - Building safety repairs - Regulatory approvals - Architectural design	- Historic renovation begins 2,500+ local jobs created - Transportation infrastructure - Innovation center build-out	- Fleet deployment - Innovation center opens - Staff training begins - Community preview events	- Services open to public 800+ permanent jobs - Community programs active - Regional expansion

SECTION 05 · GET INVOLVED

Your Voice Shapes the Link

[Attend Community Meetings](#)[Join the Advisory Committee](#)[Local Jobs & Business](#)

Public meetings are held monthly to share updates and gather your input. All perspectives — supportive and critical — are welcome. First public meeting date to be announced.

We are forming a Community Advisory Committee with neighborhood representatives. Members get direct access to project leadership and influence community-facing decisions.

We are committed to hiring locally for both construction and permanent positions. Local businesses are prioritized for services and supplies. Contact us to register your company.

Environmental Commitments

- ✓ 100% electric aircraft fleet — zero local emissions
- ✓ 100% electric autonomous vehicle fleet
- ✓ Renewable energy integration for charging infrastructure
- ✓ Net reduction in local vehicle miles traveled
- ✓ Green building standards for historic renovation
- ✓ 10–15% reduction in local traffic volume projected
- ✓ Noise monitoring systems with community feedback
- ✓ Annual environmental impact reporting to community
